Summary

Software Engineer and Computer Science graduate (2025) specializing in **Full Stack Development**. Proven expertise in building scalable web applications using **Laravel, React, and Next.js**. Skilled in architecting robust RESTful APIs, managing PostgreSQL databases, and translating complex business requirements into high-performance technical solutions through practical freelance projects.

Education

Taibah University, Bachelor of Science (B.Sc.) in Computer Science – Madinah, Saudi Arabia   Sept 2020 – June 2025
- Focused on Software Engineering, Web Development, and Algorithms.

Experience

Frontend Web Developer, Freelance / Self-Employed – Remote   Jan 2025 – present

Building responsive, high-performance user interfaces for enterprise clients using modern frontend technologies.
- Developed **"Foundations of Prevention" (FOP)**, a corporate platform using **React.js, TypeScript, and MUI**, delivering a responsive and accessible user interface.
- Optimized application performance and load times by implementing lazy loading, efficient state management, and reusable UI components.

Projects

Smart University Registration API   2025

A robust RESTful API simulating complex academic enrollment logic under high concurrency.
- Engineered **Database Locking and Transactions** to handle race conditions and prevent overbooking during peak loads.
- Implemented advanced logic for time-conflict detection, prerequisite validation, and automated waitlist promotion.
- Designed a scalable database schema utilizing self-joins and polymorphic relationships using **Laravel & MySQL**.

DevStation (Developers Social Platform)   2025

A specialized social networking platform for developers to share technical content and network.
- Built a robust **content management system** allowing developers to publish articles, upload media, and engage via likes and comments.
- Implemented a **Follow & Feed system** to create a dynamic, personalized user experience and foster community interaction.
- Developed fully automated **API Documentation** (Swagger/OpenAPI) to ensure seamless integration and developer usability.
- Designed detailed **User Profiles** showcasing technical portfolios, activity statistics, and professional networks.

Real-Time Chat Application   2025

Interactive messaging platform featuring live updates and secure communication.
- Leveraged **Next.js** and **Supabase** to enable real-time data subscriptions and instant messaging.
- Implemented secure user sessions and responsive UI design ensuring seamless communication across devices.

Skills

Backend & Database: Laravel, PHP, Node.js, PostgreSQL, MySQL, REST APIs, Database Design, System Architecture

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Material UI, Redux

Tools & DevOps: Git, GitHub, Docker, Postman, VS Code, CI/CD Basics

Certifications

Frontend Developer (React): HackerRank | 2025

Full Stack Laravel Development: Laracasts | 2025

Full Stack Web Developer: Satr | 2024

Web Application Development: Doroob | 2024

Languages

Arabic: Native

English: Fluent (Professional Proficiency)
